

Events

Events brings ScottyLabs to life for thousands of people each year. If you want to work anywhere along the end-to-end execution we do, from logistics to live experience, and at any scale, from speaker talks to [TartanHacks](#), this is the place for you. We're looking for members from any background excited to create moments that connect, inspire, and stay with students long after they leave our events.

Outreach

Outreach drives visibility and growth for everything ScottyLabs builds, leading marketing and go-to-market strategy, scaling our events and products to reach thousands of students, ensuring our work doesn't just get built, but that it gets seen, used, and remembered.

Say Hello

At ScottyLabs, we bring your ideas to life. With ScottyLabs build websites, startups, hackathons, and connections.

Scan here to join our [TartanConnect Mailing List!](#) All updates and event information will be sent through here, including the committee application, job opportunities, and more.

Where We Go

ScottyLabs

Our Mission is to foster a community of [passionate, interdisciplinary leaders](#) that use design and technology to achieve more. As a key part of the fabric of CMU for over 15 years, we have deep roots and connections where it counts.

What is ScottyLabs? ScottyLabs is Carnegie Mellon's premier builder club. We are a group of engineers, designers, entrepreneurs and organizers, passionate about building useful software projects and hosting educational events for our community. Our projects and apps reach over 80% of CMU students, and [TartanHacks](#) even hosts 1000+ hackers and reaches builders from CMU and globally.

Tech

ScottyLabs' **engineering core**, shipping flagship products across **web, mobile, and embedded** while owning the infrastructure that keeps them running. Our Tech members tackle everything from **AI agents to developer platforms**, and incubate new projects proposed by members or built through **external partnerships**.

Finance

Finance manages **hundreds of thousands of dollars** every year, while building the financial logistics for every project in ScottyLabs. Across our **6 sub teams** you'll learn how to navigate university finances, negotiate with sponsors, and work with every single committee in ScottyLabs. We are proudly supported by **our sponsors below!**

Labrador

Labrador brings students together to **build new products from idea to deployment**. Developers, product managers, and designers come together to grow ideas into real products, with ScottyLabs supporting them from concept to execution. We had **20+ active projects and over 100 members this year**.

Interested?

Labrador welcomes builders of **all backgrounds and experience levels**. If you want to learn more, Join Labrador for a **casual community dinner on September 3rd** to kick off the fall semester!

Come meet the people behind Labrador, hear what our project teams are actually building, and get a feel for what being on the committee is really like.

Schedule:

- **6:00 — 6:15 PM:** Welcome & intro to Labrador
- **6:15 — 6:45 PM:** Lightning talks / demos from project teams
- **6:45 — 7:30 PM:** Dinner + project & leadership tables (grab food, walk around, talk to whoever you want)
- **7:30 — 8:00 PM:** Open mingling, wrap up

Email hello@scottylabs.org if you're interested!

Design

Design brings together some of **CMU's strongest designers** from a wide range of backgrounds. Our work focuses on two core areas: **branding and UI/UX**. We create visual identities for major conferences like TartanHacks, as well as smaller campus events, and design digital products for technical and research-driven projects.

Foundry

CMU's premier **founder-first startup accelerator**. Foundry hand-picks up to seven teams per cohort, connects them to **50+ VC firms**, and runs the builder community around them. Fifteen companies came through the forge in our first year, and affiliated teams have **raised \$11M+ in eight months**. We're recruiting for the 3 teams within Foundry

The Cohort: for founders

- 7 teams per sem
- No equity, no fees. Weekly VC and founder sessions
- Protected one-on-one time with investors
- Warm introductions to 50+ firms.

The Builders: for the CMU entrepreneurship community

- 30 teams a semester
- 0 to 1 program for people at the very start
- Builders get weekly sessions with working VCs and founders
- Feedback and resources to improve your pitch.

The Committee: the backbone of Foundry

As an analyst on one of our three teams, you will run Foundry alongside our Partners and Associates:

- **Accelerator:** VC relationships, investor events, cohort programming, and Demo Day.
- **Talent:** the builder community, talks and socials, and Foundry's database of founders we can endorse.
- **Outreach:** podcast management, speaker series planning, social media outreach, community event planning

Interested?

Foundry is **hosting a dinner on September 5th 6-8 PM**. Come hear how the accelerator actually runs, what each committee does, and how we pick a cohort. We're looking for people to join Foundry's Committee and Cohort. Email foundry@scottylabs.org if you're interested!
